Executive Summary

Capital Improvement Program Overview

A Capital Improvement Program (CIP) is a planning document that identifies capital improvement projects (e.g., roads and bridges) a local government or public agency intends to build over a certain time horizon (usually between five and twenty years). CIPs typically provide key information for each project, including delivery schedule, cost, and revenue sources. The County's CIP provides a means for the Board to determine capital improvement projects and funding priorities over a 20-year horizon.

In order to maintain the integrity of the County's roadway network, the County is required to implement General Plan Policy TC-Xb and Implementation Measures TC-A and TC-B. These measures require the development of a 5-, 10-, and 20-year CIP. These policies also require an update of the twenty-year growth forecast every five (5) years.

The forecast is needed to update the CIP and Traffic Impact Fee (TIF), formerly the Traffic Impact Mitigation (TIM) Fee Program. Forecasting growth is an iterative and ongoing process – forecasts are reviewed and adjusted annually, as well as every five (5) years. Routinely verifying and updating growth forecasts allows the County to account for new information and adjust its assumptions and plans accordingly. A TIF is a fee levied by a local government or public agency to ensure that new development projects pay for all or a portion of the costs of providing public infrastructure or services to the new development. Since 1984, the County has adopted and updated various TIM Fee programs to ensure that new development on the western slope pays the costs of constructing and improving county and state roads necessary to serve new development. The TIF is paid at the time of issuance of a building permit (e.g., for single-family homes or non-residential buildings) or whenever appropriate if no building permit is being issued. TIFs are calculated pursuant to Government Code 66000 et. seq. and the County's General Plan policy. Generally, fees are based on the type of land use, quantity, location, impact on roads, and level of service (LOS). TIFs are assessed by one of three (3) designated zones in which the development occurs. The TIF Program received a Major Update in 2024 and an Adjusted Update in 2025 to reflect future changes.

CIP Book Format

Indexes

Indexes in Section 1 provide alternate ways to locate detailed project summaries – alphabetically, and by project number.

Cash Proformas

Section 3 includes cash proformas for the TIF Program, Local Funds – Tribe, the Missouri Flat Corridor Master Circulation and Funding Program, and Regional Surface Transportation Program (RSTP) Match and Exchange Funds. The cash proformas show how funding source revenues are used and what is left in each fund at the end of each fiscal year. Pending and approved reimbursements are also noted in this section, as well as a description of revenue sources and their potential uses.

Individual Projects

The 2025 CIP Book includes two (2) capital programs:

- ❖ West Slope Road/Bridge (CIP)
- ❖ Tahoe Environmental Improvement Program (EIP)

Individual project summaries are provided in alphabetical order in Section 4 for each project in the CIP. The summaries provide detailed descriptions, location maps, schedule, and cost and revenue information. The “Revenues” section of each project summary lists the various

funding sources for each project, including TIF funds, State and Federal grants, developer advances, etc. The “Expenditures” section of each project summary includes the various types of costs planned to be incurred for each project (i.e., Planning/Environmental, Design, Right of Way, Construction, and Environmental Monitoring.)

The “Project Schedule” section provides an estimate of the funding year each phase is expected to occur. This section is divided into the following phases:

1. **Planning/Environmental:** This phase includes expenditures for “Planning/Env DOT Staff” and “Planning/Env Consultant.” Typically, the first step in the project delivery process, the Planning/Environmental phase includes all costs related to planning the project, including the preliminary design and research required to complete the environmental analysis. “Planning/Env DOT Staff” refers to the cost for Transportation staff time, while “Planning/Env Consultant” includes all other costs (e.g., staff time from non-Transportation departments, external consultants who specialize in environmental analysis, rental of monitoring equipment, etc.).
2. **Design:** This phase includes expenditures for “Design DOT Staff” and “Design Consultant.” The Design phase includes all costs related to developing the project plans, specifications, and engineer’s cost estimates to make a project bid-ready. This phase usually begins after the environmental document has been certified by the Board and can be completed in parallel with the Right of Way acquisition phase. “Design DOT Staff” refers to the cost for Transportation staff time, while “Design Consultant” includes all other costs (e.g., staff time from non-Transportation departments, external consultants, etc.).
3. **Right of Way (ROW):** This phase includes expenditures for “ROW DOT Staff,” “ROW Acquisition,” “ROW Consultant,” and “ROW Utility Relocation.” The Right of Way phase includes all costs related to determining what property or easements are needed for a CIP project, utility relocation, and acquisition. This phase begins after the environmental document has been certified by the Board and can be completed in parallel with the Design phase. “ROW DOT Staff” refers to the cost for Transportation staff time; “ROW Acquisition” refers to the cost of land; “ROW Utility Relocation” refers to the relocation of any utilities in the project location, and “ROW Consultant” includes all other costs (e.g., staff time from non-Transportation departments, external consultants, etc.).
4. **Construction:** This phase includes expenditures for “Construction Eng Staff,” “Construction Eng Consultant,” and “Construction.” This phase includes all costs related to managing, overseeing, and inspecting a project once the project has been bid and awarded to an external firm for construction, as well as the cost of physically constructing a project. “Construction Eng Staff” refers to the cost for Transportation staff time, while “Construction Eng Consultant” includes all other labor costs (e.g., staff time from non-Transportation departments, external consultants, etc.). “Construction” refers to the actual cost to build the project.
5. **Environmental Monitoring:** This phase includes the costs associated with monitoring the environment affected by the project to ensure any impacts are mitigated. The Environmental Monitoring phase includes expenditures for “Environmental Mitig Monitor Staff” and “Environmental Mitig Monitor Consultant.” “Environmental Mitig Monitor Staff” refers to the cost for Transportation staff time while “Environmental Mitig Monitor Consultant” includes all other costs (e.g., staff time from non-Transportation

departments, external consultants who specialize in environmental analysis, rental of monitoring equipment, etc.).

The project initiation date either coincides with the date of the project engineer's initial estimate or the date of Board adoption of 2004 General Plan TIM Fee Program Resolution 266-2006, TIM Fee Ordinance No. 5045 and the accompanying TIM Fee Resolution 191-2016, the TIM Fee Program Technical Update Resolution 077-2018, or TIF Resolution 196-2020.

Unfunded Projects

In addition to the funded CIP projects (using TIM/TIF, state/federal grants and other local funding), an unfunded list is included in the CIP Book after the funded projects. The unfunded list was compiled using various sources, including:

- Projects in the current or previous CIP or TIM/TIF programs which are no longer eligible for TIF funding under the updated TIF program.
- Projects suggested by the public or County staff.
- Projects included in various plans and reports, including but not limited to the following:
 - *El Dorado County Active Transportation Plan 2020.*
 - *Green Valley Road Final Corridor Analysis Report, 2014.*
 - *Diamond Springs-El Dorado Area Mobility and Livable Community Plan, 2014.*
 - *Cameron Park Community Transportation Plan, 2015.*

For further clarification, the unfunded list includes projects that were suggested by the public. These suggested projects may be partially included in the CIP or TIF Program. Unfunded projects may be added to the CIP by the Board as funding becomes available.

Department of Transportation

Capital Improvement Program Overview

El Dorado County Department of Transportation (Transportation) engages in a number of activities to assess and plan for the short and long term needs of the community. The Capital Improvement Program (CIP) represents Transportation's strategy for infrastructure development and maintenance.

Key criteria used for project consideration and prioritization include: health and safety, project costs and funding, community support, consistency with the General Plan, and ongoing maintenance costs. Potential new projects are reviewed by Transportation staff and presented to the Board for discussion and inclusion in the CIP. The CIP is a planning tool that Transportation updates annually as new information becomes available regarding priorities, funding sources, project cost estimates and schedule.

Transportation's goals for the CIP are to:

- Maintain and upgrade existing infrastructure to support existing residences and businesses.
- Develop new capital projects to help meet the highest priority community growth needs.
- Align capital budgets with adopted policies and plans.
- Link the County's development and fiscal planning processes.
- Broaden public participation in the budget process by providing documentation and scheduling hearings early in the process.
- Increase coordination between internal departments and public agencies.

CIP Overview

The CIP serves as a planning and implementation tool for the development, construction, rehabilitation, and maintenance of the County's transportation infrastructure. Capital improvements are projects that provide tangible long-term improvements or additions of a fixed or permanent nature, have value, and can be depreciated. The CIP process includes identifying, prioritizing, and developing funding for needed projects. The CIP includes ongoing projects started in previous years and new projects starting in the current and future fiscal years.

The CIP is constrained by limited available funding sources that have specific restrictions on how they can be used. Currently, the County's infrastructure needs in the twenty-year time frame exceed available resources, which results in competing priorities for limited funds. In order to resolve this issue, Transportation uses outside funding sources (Federal, State, and other grants) whenever possible, in addition to County funds (e.g., Traffic Impact Fees (TIF) Fees, General Fund).

The CIP makes up over half of Transportation's budget. Transportation coordinates the development of the capital budget with the development of the operating budget, so that future operating costs are projected in alignment with the capital infrastructure.

Project Prioritization

Transportation uses several criteria to prioritize road improvement projects including:

- **Estimated Construction Start**
 - The first fiscal year the project is planned to be in construction.
 - Projects estimated to start construction in fiscal year (FY) 2025/26 or 2026/27 are more desirable.
- **Supports Economic Development in the County of El Dorado**
 - Projects that would help create connections to pave the way for new commercial development are more desirable.
- **Safety Ranking**
 - Projects are rated High, Medium, or Low based on the likelihood that they would improve safety conditions once constructed (High = higher likelihood of the proposed project improving safety).
 - Projects with Medium or High rankings are more desirable.
- **Capacity/Traffic Relief**
 - Traffic volumes are counted and reviewed for existing roads to provide a relative sense of how heavily they are used.
 - For proposed new roads, projected traffic volumes are provided from recent traffic studies.
 - Projects which improve roadway capacity in growing areas are more desirable.
- **Funding/Grant Leveraging**
 - Projects are ranked high, medium, or low based on their ability to obtain grant funding (High = higher likelihood of attracting grant funding).
 - Projects with medium or high rankings are more desirable.
- **California Department of Transportation (Caltrans) Sufficiency Rating (applicable to Bridge projects)**
 - Caltrans' bridge sufficiency ratings are based on a scale of 1-100. Bridges that have a minimum span greater than 20 feet are inspected by Caltrans every two years. Ratings are given based upon a number of factors.
 - Bridge projects eligible for rehabilitation or replacement must be rated in poor condition. Rehabilitation funding is recommended for major reconstruction of the bridge to meet current standard needs for a minimum of ten (10) years into the future. Replacement funding is requested by the local agency and is determined with Caltrans.

In addition to prioritizing projects in or near construction, Transportation prioritizes projects the Board has previously expressed an interest in moving forward. Transportation has continued to pursue potential Federal grants for rural bridge rehabilitation or replacement, which require little or no matching funds. This effort facilitates delivering these bridge projects now, avoiding the need for maintenance or replacement at a future date when grant funding may no longer be available.

CIP Annual Updating Process

All Transportation programs are reviewed and updated annually, including revenue estimates, project scopes, costs, and schedules. Proposed changes to the CIP are usually finalized upon Board adoption in June. The CIP current work plan is developed concurrently with the Transportation budget for the upcoming fiscal year.

The typical CIP/Budget cycle is shown in Figure 1-3.

Figure 1-3: Typical CIP/Budget Cycle

The Tahoe Environmental Improvement Program (EIP) has additional review requirements which is tied to the specific funding sources. The Tahoe EIP is tied directly to Tahoe Regional Planning Agency (TRPA) annual planning cycle.

Tahoe Environmental Improvement Program

The Lake Tahoe Basin has long been at the forefront of environmental improvements at Federal, State and Local levels. Transportation's Tahoe Engineering Unit (TEU) is solely grant funded, and is primarily responsible for capital projects identified in the Tahoe EIP to improve the environmental quality of Lake Tahoe. Projects are aimed at implementing improvements in the Lake Tahoe watershed, airshed, and the lake itself. TEU's projects address the EIP threshold categories of Water Quality, Soil Conservation/Stream Environment Zone, Air Quality/Transportation, Fisheries and Recreation. These environmental threshold carrying capacities are defined as environmental standards necessary to maintain significant scenic, recreational, educational, scientific, or natural values of the Lake Tahoe Region, or to maintain public health and safety within the region.

As tourism and summer outdoor recreation become more important in the Lake Tahoe Basin, more bike trail projects are appearing in the Tahoe EIP. The construction season in Tahoe is limited to May 1 through October 15, per regulatory ordinances. Since TEU's environmental improvement projects are dependent on grant funds, the projects included in this EIP represent TEU's best project delivery forecast at this time.

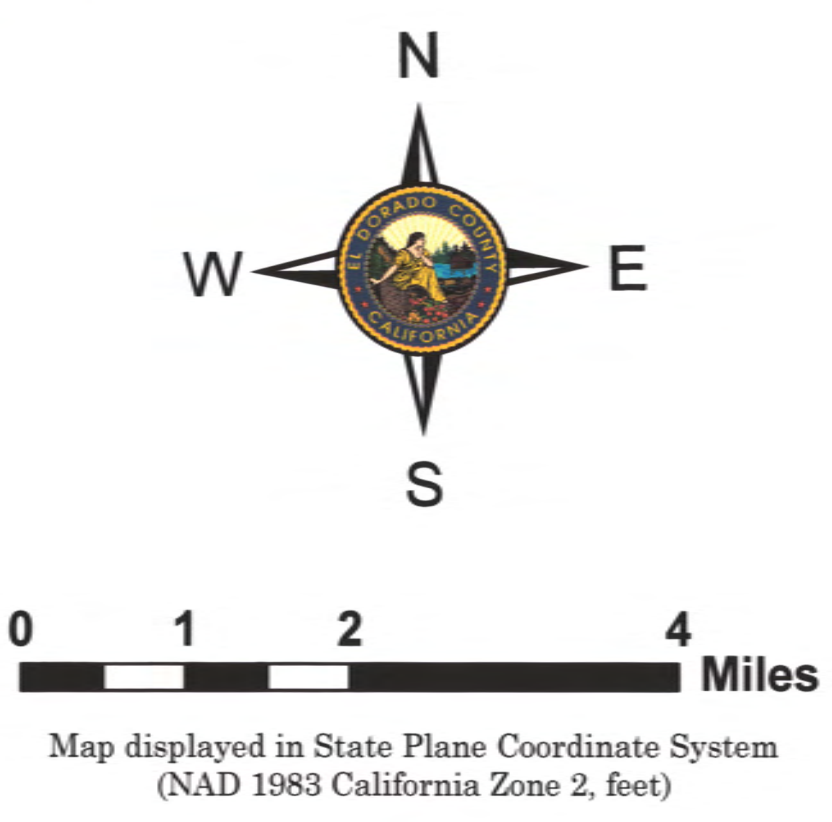

Tahoe EIP Annual Updating Process

The EIP program is reviewed and updated annually, including revenue estimates and project costs and schedules. The EIP is developed concurrently with Transportation's budget for the upcoming fiscal year.

In the case of the EIP, the needs of granting agencies are reviewed during July through November, and project costs and anticipated revenues are updated. TEU staff identifies the needs of granting agencies, updates the Federal/State/Local grant forecast and revises projects in the Tahoe EIP based on latest cost and grant information. This list is then submitted to the Tahoe Regional Planning Agency (TRPA) for review in December.

Revenue Information and Cash Proformas

Revenue Sources and Potential Uses

Accumulative Capital Outlay: Can be used for capital outlays including the construction and maintenance of capital facilities. In the CIP, this funding is used for matching funds for Federal Aviation Administration grants for Airport projects.

Federal/State Grants: Grants awarded for various types of (primarily) capital projects. For example: Federal Lands Access Program, Highway Bridge Program, Highway Safety Improvement Program, and Congestion Mitigation and Air Quality Program.

General Fund: Can be used for anything the Board directs the Division to use it for, including capital overlays, road maintenance, matching funds for bridge grants, etc.

Highway 50 TIM: Traffic Impact Mitigation fees collected in all Zones to fund road improvements along the Highway 50 Corridor.

Highway 50 TIF: Traffic Impact Fees, formerly Traffic Impact Mitigation Fees or TIM Fees, collected in all Zones to fund road improvements along the Highway 50 Corridor.

Local Tribe Funds: These funds can be used for public improvements as determined by the Board of Supervisors, including, but without limitation, to road improvements and/or maintenance per the Amendment of Memorandum of Understanding and Intergovernmental Agreement between the County of El Dorado and Shingle Springs Band of Miwok Indians.

MC&FP: Master Circulation and Funding Plan: A portion of the sales and property tax collected in the Missouri Flat MC&FP district, which is to be used to fund roadway capital improvement projects inside the district (e.g., Missouri Flat Interchange, Diamond Springs Parkway).

Public Utility Franchise Fees: Provided for under the Streets and Highway Code, Sections 680-694. Public utility companies have entered into franchise agreements that provide for the payment of franchise fees to the County based on a percentage of power sales.

Road District Tax: A percentage of property taxes.

Road Fund: Used mostly in road maintenance, but occasionally used for Capital Overlay and Rehabilitation Program projects.

RSTP: Regional Surface Transportation Program. This program was established by California State Statute utilizing Surface Transportation Program Funds that are identified in Section 133 of Title 23 of the United States Code. Various types of projects are eligible for funding from the RSTP including, but not limited to construction, reconstruction, rehabilitation, resurfacing, restoration, and operational improvements on Federal-aid highways and bridges; safety improvements on public roads of all functional classifications; capital costs for transit projects eligible for assistance under the Federal Transit Act; etc.

Rural RSTP: Can only be used in areas that are outside those identified as Urban on the Sacramento Urbanized Area Map.

Sacramento Municipal Utility District (SMUD): Agreement with SMUD and El Dorado County to provide funding for the construction and maintenance of the roads within the Upper American River Project (UARP). The UARP is a network of reservoirs and powerhouses located along the American River that contain recreational facilities owned and operated by SMUD.

State Highway Users Tax (aka “Gas Tax”): Provided for under the Streets and Highway Code, Sections 2104-2106. Most of this funding is calculated by formula based on the number of licensed vehicles and maintained mileage.

TIF: Traffic Impact Fees, formerly Traffic Impact Mitigation Fees or TIM Fees.

TIF Zone A: Traffic Impact Fees to fund road improvements, formerly TIM Zones 1 and 4-7 of TIM Zone 1-7.

TIF Zone B: Traffic Impact Fees to fund road improvements, formerly TIM Zones 2 and 3 of TIM Zone 1-7.

TIF Zone C Local Road: Traffic Impact Fees to fund road improvements in the El Dorado Hills area (formerly TIM Fee Program Zone 8).

TIM Fees: Capital projects in “Exhibit B” of the most current Board adopted TIM Fee Resolution.

TIM Zone 8: (formerly known as “El Dorado Hills/Salmon Falls Area RIF”) Traffic Impact Mitigation fees to fund road improvements in the El Dorado Hills area (TIM Fee Program Zone 8).

TIM Zones 1-7: Traffic Impact Mitigation Fees to fund road improvements in the remainder of the county (TIM Fee Program Zones 1-7), excluding El Dorado Hills and Tahoe.

Urban RSTP: Can only be used in the urbanized area based on the Sacramento Urbanized Area Map 2010. The Sacramento Urbanized Area Map was developed by the FHWA based on 2010 census data.

Project Description:

In 2022, the El Dorado County Department of Transportation prepared an Intelligent Transportation Systems (ITS) Master Plan with a vision of strategic deployment of technology and strategies to improve mobility and circulation for the traveling public. The first phase of the implementation plan includes improvements to the communications systems of El Dorado County's traffic signal facilities with a centralized Traffic Operations Center (TOC). This project will connect telecommunications facilities to the Headington Road Maintenance building and provide communications equipment to establish a County TOC. This effort will include planning, design, construction, and purchase of necessary telecommunications equipment. Additional projects will follow to connect the remote signal facilities to the TOC to implement remote observation and operation of traffic signals and future ITS facilities.

US 50 / Ponderosa Road / South Shingle Road Interchange Improvements

CIP Project Summary

Project No: 36104010

Type: Interchange

Supervisor District(s) 4

LOCATION MAP

NOT TO SCALE

Project Description:

Project provides capacity improvements to the interchange, includes a detailed study to identify a preferred alternative. This phase of the project includes the widening of the existing US 50 overcrossing to accommodate five lanes and the realignment of the westbound on-ramp and eastbound loop on-ramp, and widenings along Mother Lode Drive and South Shingle Road. Preliminary engineering for all phases (projects 71333/36104010, 71338/36104008 and 71339/36104009) shall be performed under the interchange project. This project requires the construction of US 50 /Ponderosa Road - North Shingle Road Realignment (project 71338/36104008) and US 50 / Ponderosa Road Interchange - Durock Road Realignment (project 71339/36104009). This project shall also be coordinated with US 50 Eastbound Auxiliary Lanes - Cameron Park Interchange to Ponderosa Road Interchange (53127/36104020), and US 50 Westbound Auxiliary Lanes - Ponderosa Road Interchange to Cameron Park Drive Interchange (53128/36104024).

Chiapa Erosion Control Project

CIP Project Summary

Project No: 36107011

Type: Erosion Control - (EIP)

Supervisor District(s) 5

LOCATION MAP

NOT TO SCALE

Project Description:

The Chiapa Erosion Control Project encompasses the streets of Chiapa Drive, Tolteca Court and Taos Court. The main goal of the Project is to improve the clarity of Lake Tahoe by reducing the detrimental water quality impacts of Tahoe Paradise Unit No. 34 subdivision on Lake Tahoe clarity. The objective of the Project is the reduction in the transport of fine sediment from the Project area by constructing water quality Best Management Practices (BMPs) prior to reaching the Upper Truckee River to the maximum extent practicable.

Cold Creek Fisheries Project

CIP Project Summary

Project No: 36107018

Type: Erosion Control - (EIP)

Supervisor District(s) 5

LOCATION MAP

NOT TO SCALE

Project Description:

The original Project scope was to complete a comprehensive stream corridor restoration effort which included a 1 mile reach of Cold Creek, the STPUD access road, the culvert at Pioneer Trail, and the CSLT Globin Ponds. An existing Conditions Analysis Report was completed in May of 2006 which described the majority of the problems within this corridor and opportunities and constraints for the Project alternatives. Upon TAC review of the Report and further discussions with respect to the scope of work it was decided to reduce the scope of work for the County Project to just the culvert at Pioneer Trail. Therefore, the current Project includes addressing the culvert at Pioneer Trail with respect to fish passage only. The goals of this Project are to enhance/improve fisheries and riparian habitat along a portion of Cold Creek, reduce sediment load from adjacent road and reduce sediment load from adjacent slopes.

Delaware Water Quality Project

CIP Project Summary

Project No: 36107019

Type: Erosion Control - (EIP)

Supervisor District(s) 5

LOCATION MAP

NOT TO SCALE

Project Description:

This Project encompasses the Tahoe Paradise Units No. 20, 22, 23, and 24 subdivisions, which includes Delaware Street, Kiowa Drive, and Kickapoo Street. The primary goal of the Project is to improve the clarity of Lake Tahoe by reducing detrimental water quality impacts that are a result of the development of Tahoe Paradise Units No. 20, 22, 23, and 24. The objective of the Project is the reduction of the transport of fine sediment from the Project area to the Upper Truckee River by construction water quality Best Management Practices.

Project Initiation Date: 2/9/2017

CIP Project Summary

Project No: 36105050

Type: Roadway

Supervisor District(s) 5

Project Description:

The Fallen Leaf Road Recreational Access Project will minimize pedestrian, bicyclists, and vehicle conflicts that occur on Fallen Leaf Road between the Fallen Leaf campground and Tahoe Mountain Road. The proposed project will include construction of approximately 2.2 miles of shared-use path with paved trailhead parking at either end of the path. The project would start at Fallen Leaf Campground and end near the intersection of Tahoe Mountain Road and Angora Ridge Road.

North Upper Truckee SEZ Restoration Project

CIP Project Summary

Project No: 36107012

Type: Erosion Control - (EIP)

Supervisor District(s) 5

LOCATION MAP

NOT TO SCALE

Project Description:

The goal of the project is to restore Lake Tahoe's clarity and protect a sensitive stream environment zone (SEZ) through effective and safe conveyance of urban runoff from the project area and the downstream to treatment facilities. The current condition allows for excessive sediment and nutrient transport to the SEZ through uncontrolled urban runoff conveyance, directly discharging to a perennial stream historically known as "Slump Alley". Slump Alley is a sensitive riparian area with annual flows that house a unique brook trout population and stream environment zone that flows to protected State Park known as the Washoe Meadows State Park. The current configuration requires the use of roadside ditching and excessive road maintenance disturbance, due to surface elevation of the road being equal to or lower than the surrounding SEZ. This Project intends to responsibly convey water from the existing road along North Upper Truckee Road and down Lake Tahoe Boulevard to Mountain Meadow Drive, which will provide water quality, SEZ restoration, fisheries, general transportation and social benefits to Lake Tahoe and the surrounding community. The proposed project will evaluate the best methods to alleviate the current road impacts to the SEZ through a responsible and collaborative approach, with the best interest of Slump Alley stream in mind.

Pioneer Trail/US Highway 50 Intersection Safety Improvement Project

CIP Project Summary

Project No: 36104026

Type: Intersection

Supervisor District(s) 5

LOCATION MAP

NOT TO SCALE

Project Description:

This project will improve the intersection of US 50 and Pioneer Trail in Meyers by replacing the existing signalized intersection with a roundabout. Multiple agencies including El Dorado County, Caltrans Headquarters, Caltrans Maintenance, Caltrans Traffic Operations, CHP, TRPA, FHWA, participated in analyzing the U.S. 50 Meyers Corridor and this intersection for potential safety improvements in 2016. Nearly all of the project is in Caltrans right of way, and when Caltrans procedures are used to determine intersection improvements that will provide the greatest operational and safety benefits, it is likely that a roundabout will be constructed to replace the existing signalized intersection.

South Tahoe Greenway - Upper Truckee River Bridge at Johnson Meadow

CIP Project Summary

Project No: 36107023

Type: Pedestrian Way/Bike Path

Supervisor District(s) 5

LOCATION MAP

NOT TO SCALE

Project Description:

The South Tahoe Greenway - Upper Truckee Bridge at Johnson Meadow Project will build upon the Dennis T. Machida Memorial Greenway shared use path network through the south shore of Lake Tahoe. The Project aims to construct approximately 1.2 miles of a Class 1 shared use path and replacing a heavily trafficked bridge over the Upper Truckee River damaged by the 2017 winter storms. The Project will provide active transportation users a critical link to Barton Hospital from the west and the Tahoe Sierra neighborhood and the Lake Tahoe Community College to the east.

Project Initiation Date: 2/11/2020
