IMAGECAST® CENTRAL

Efficient & scalable central count system.

EFFICIENT

Uses industry-leading COTS hardware to decrease costs and minimize risk of failure.

SIMPLE

Intuitive software that uses touchscreen navigation and requires minimal training.

FLEXIBLE

Modular and scalable to an election of any size - meeting the needs of all jurisdictions.

SECURE

Meets EAC security standards to preserve integrity and auditability.

FEATURES & BENEFITS

Streamline Central Count Processes

• Ballots, scanned in batches, are processed suiting jurisdictional requirements and preferences.

• Once scanned, ballots with out-stack conditions are automatically sent to the Adjudication application for digital ballot review.

System Flexibility To Meet All Needs

• Provides ample flexibility to meet the needs of small, medium and large jurisdictions.

• Ability to add multiple commercial scanners to increase efficiency without breaking the bank.

Engineered Simplicity

• The operator loads a batch and presses "scan" - simple! When the batch is complete, the operator presses "accept" - easy!

• Simple set-up procedures and easy to follow maintenance schedules ensure ongoing performance throughout your election cycles.

Scanning Reliability

• Features AuditMark® ballot image auditing capability that retains a secure digital image of every ballot cast.
• Can be used in conjunction with the Adjudication digital ballot review application.

FLEXIBLE HARDWARE

CANON M260

Low Cost and Highly Scalable

Fully Integrated with ImageCast Central Software

Scans single-sided and double-sided 11" to 22" ballots

Up to 120 images per minute depending on settings

CANON G1130

Mid-range Cost and Highly Scalable

Fully Integrated with ImageCast Central Software

Scans single-sided and double-sided 11" to 22" ballots

Up to 200 images per minute depending on settings

INTERSCAN HIPRO

Single unit for high capacity needs

Fully integrated with our ImageCast Central Software

Small footprint of approximately 16 square feet

Scans single-sided and double-sided 11" to 22" ballots

Dual input trays for continuous scanning

Up to 300 images per minute depending on settings

Different Capacity Hardware Options

Makes use of industry-leading commercial off-the-shelf (COTS) hardware to decrease capital costs, minimize risk of hardware failure and improve maintainability.

Most central count solutions that exist in the market today are large, expensive, proprietary solutions that are not scalable, efficient, or easy to maintain - the ImageCast® Central is the opposite.
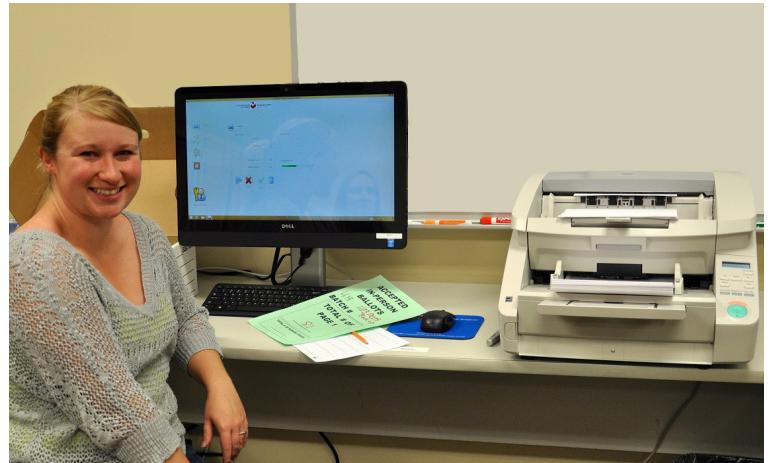

SCALABLE & EFFICIENT

The ImageCast® Central is the most **cost-effective system that offers efficiency, scalability and flexibility;**

"The new system has enhanced our ability to deliver efficient elections for the citizens of Denver. We achieved our key objectives, which included innovating the voter's experience, increasing operational efficiencies, and enhancing transparency."

Amber McReynolds, former Director of Elections, Denver Elections Division

"The choice to utilize the Dominion system has provided our county government and citizens with an efficient solution. The system makes better use of tax payer monies and provides a more robust set of data for result audits."

Sheila Reiner, County Clerk, Mesa County CO
Image: Amanda Polson, Elections Director

The ImageCast® Central is used to tabulate results from all ballots and all voting channels. As ballots are scanned, the system automatically digitally out-stacks ballot images needing review - our Adjudication application then takes over. **The Adjudication application is the digital tool that provides real time efficient multi-user adjudication of ballots, with customer-defined out-stack conditions.**

DOMINION VOTING
